Final Project Design Write-Up

I plan to revamp the Irish Wrecks Online website to make it more accessible and easier to use. I will use simple but electric designs with several accent colors, mainly warm colors, to achieve this look. There will be some simple shapes like cubes and circles or maybe Irish related images that I will incorporate into the design, and I hope that it will look fun and playful for younger audiences. I want it to be simple and easy to look at and navigate as opposed to being clashy and hard to understand so I will add some text and labels for different navigations.
